WORK EXPERIENCE

Prodigia Procesos Digitales Administrativos

Feb. 2022 – Present

Full Stack Developer | React | Node.js | Amazon Web Services | Java

Hermosillo, Sonora

- I have worked on web applications focused on fintech.
- Developed an onboarding process for users to send their information and create accounts for making and receiving payments from other banks, I have used external services for validating user IDs and documentation, and the verification process ensures that 85% of the users have fraudulent documentation.
- Developed and resolved problems in various project processes, including admin management and charting, facilitating the work of my coworkers.
- Utilized Amazon Web Services for designing the project's infrastructure, leveraging cloud solutions to ensure scalability and easy integration with other tech stacks while at the same time helping other projects to integrate into the cloud making projects 99% available.

Almada Technologies

Dec. 2019 – Jan. 2022

Full Stack Developer | Vue | Node.js | Google Cloud | React native

Navojoa, Sonora

- I have worked on web applications for animal feeding management applications for "bretton" company.
- Designed and implemented a comprehensive management application for pig and poultry farming. Resolved challenges related to feed pricing, tracked remaining feed types, and managed leftover costs from the previous month making the company manage 3 times faster than the previous old desktop application.
- I have worked on a mobile application that connects with a company API and receives notifications about budgets. Users can list, check the cost of products, and accept or decline the budgets, 15 workers are making a good.

ACTI (ITSON)

Mar. 2015 – Oct. 2018

Full Stack Developer | ASP.net | C# | Team Foundation

Navojoa, Sonora

- Developed a landing page and a forum platform dedicated to teachers. Facilitated teacher submission of articles and blogs to be shared with parents.
- Designed and developed an application tailored for industrial engineering exams. Empowered teachers to create questions and generate exams in either PDF or online formats by selecting specific questions.
- I made courses for students for SQL Server certification. The course consisted of 6 modules with SQL topics.
